

Our Ref: AJW/CH

11 April 2018

We were delighted to work with Ascia construction to create a new Dementia Support Hub in Tangmere.

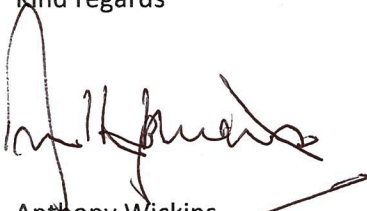

They worked closely with us to deliver this outstanding community care project that was handed over on time, in budget and with a close attention to detail and quality.

Ascia worked considerably while we continued to operate the temporary Dementia Hub adjacent to the building project. They engaged with the community, inviting local primary school children to visit the site and see the build in progress. Their support was extended further when they organised and took part in a sponsored cycle ride to kindly raise funds for the charity.

We would like to thank Site Manager Tim Brown and the Ascia team for their dedication to the project, their professionalism and high standard of workmanship.

We would highly recommend Ascia Construction.

Kind regards

Anthony Wickins
Chairman
