For the attention of Neil Cole

9th January 2017

Dear Neil,

RE: Ascia Construction Reference

We found Ascia Constructions work ethic and attitude very good from start to finish.

There was regular communication from site, managing the works safely and efficiently, with constant consideration of the desired end product including presenting alternative value engineering options to achieve best value.

The project was accurately managed with excellent reporting, tracking of the programme and cost management/forecasting which resulted in the scheme being handed over on time and on budget. Snagging and quality control throughout the project was of a high quality and this ensured that hand over was on time.

Health and Safety issues were managed well and there were no reported accidents or incidents.

In summary, we would have no hesitation in recommending Neil, Rob and the Ascia Construction team.

Yours sincerely

ANDY GOODRIDGE
