Dear Sirs

I would like to thank Ascia Construction and their team who have spent the last 48 weeks on the conversion of dilapidated cow sheds in Itchen Abbas into Luxury residential properties. This Conversion has significantly transformed the former barn yet it settles into its surroundings effortlessly.

We have been impressed with the professionalism and dedication displayed and in particular would like to thank Will Heatley, the Site Manager, for his diligence in ensuring that all works were carried out efficiently and to a superb standard whilst achieving completion on time and within budget.

Throughout the process communication with the Contract Team has been exceptional and the enthusiasm and ability to overcome and adapt to the project and accommodate client requests was appreciated.

I would be very keen to work with them again on future projects.

Yours sincerely

Matthew Stride MRICS
